

# Water Leakage Monitoring Solution

## Overview

Water leakage and flood monitoring are important mechanisms which help protect key assets from flood-related damages.

Avnet provides a Water Leakage Monitoring Solution which supports and aids customers in problem solving. This easy-to-install water leakage monitoring solution is connected to Avnet cloud portal, which supports remote monitoring function. Any detection of water leakages will trigger alerts on the cloud portal, which will be sent to the manager or administrator through email, SMS, WhatsApp or other methods, thereby allowing quick responses and minimizing any consequences or issues.

## Features

- Water leakage/liquid leakage/flood detection
- Instant response and reporting
- Accumulated incident recording
- Measurement history reporting
- Alerts to respective users can be sent via different communication methods such as SMS, email, WhatsApp, etc.

## Systems

- Water leakage sensor
- Sigfox module

## Target Applications

- Water leakage monitoring
- Flood monitoring
